In the middle of the great curve of the Himalayan mountains lie the 8,000 m (26,000 ft) peaks of Dhaulagiri and Annapurna in Nepal, separated by the Kali Gandaki Gorge. The gorge splits the Himalayas into Western and Eastern sections both ecologically and orographically – the pass at the head of the Kali Gandaki, the Kora La is the lowest point on the ridgeline between Everest and K2. Lower Himalayas with an average height of 3,700 m Sub Himalayas with an average height of 900 to 1,200 m. It is the youngest of the three ranges. It is mainly made up of eroded matter from the rising Himalaya and the next is The Himalayas is the highest and one of the youngest mountain ranges in the world. Its origin can be traced in the Jurassic Era, which is about 80 million years ago. The Levoit Kana Himalayan Salt Lamp is a small yet perfect product if you are buying it for the first time. The lamp is the smallest of the Boho-chic series of salt lamps by Levoit, with size 5-8 lbs.
