The proof of this statement uses the Cauchy integral theorem and like that theorem it only requires f to be complex differentiable. Since the reciprocal of the denominator of the integrand in Cauchy's integral formula can be expanded as a power series in the variable $(z - z_0)$ (namely, when $z_0 = 0$), ...Integrals of Cauchy Type on the Ball by Sheng Gong, 9781571460059, available at Book Depository with free delivery worldwide.
