The async operation is started before returning the promise. The caller can immediately use the returned promise (via its fluent API) even though the asynchronous operation is still in flight and has not yet completed.. Upon completion of the async operation, in whatever way that notification actually occurs, LoadAsset resolves the promise:ACT I SCENE I. King Lear's palace. Enter KENT, GLOUCESTER, and EDMUND KENT I thought the king had more affected the Duke of Albany than Cornwall. GLOUCESTERIt's the services offered and offbeat requests that are perhaps the most touching, enabling people to give in the most precious ways. Members use their words, rather than abbreviated "ISO," for example, which can feel alienating to those who don't typically join buy/sell/trade groups.Murphy's law is an adage or epigram that is typically stated as: "Anything that can go wrong will go wrong".
